

STEEL CARABINER

The steel 16 mm opening carabiner has a double action locking system (with automatic closing by spring action and manual locking using a cylindrical nut) making involuntary or accidental unlocking impossible. The carabiner is an essential part of any fall prevention system. It is designed for use as the connection between the various system components or to connect the various components to the work structure anchor point.

- ▶ Steel screw carabiner, 16 mm opening diameter
- ▶ Double action: automatic closing by spring action and manual locking using a cylindrical nut
- ▶ This system completely stops involuntary or accidental carabiner unlocking
- ▶ All of the carabiner components (body, locking part, nut, spring, ratchets and pins) are made from high mechanical resistance steel

Product characteristics

Material	Steel
